Press Release

8th Aachen Colloquium China Automobile and Engine Technology November 14th - 16th, 2018 Beijing Marriott Hotel Northeast, China

October 2018

Professor Stefan Pischinger (Institute for Combustion Engines, RWTH Aachen University) and Professor Lutz Eckstein (Institute for Automotive Engineering, RWTH Aachen University) are delighted to announce the **8th Aachen Colloquium China Automobile and Engine Technology**. The conference takes place in the Beijing Marriott Hotel Northeast, China, from November 14th to 16th, 2018. With more than 500 participants from all over the world, the 7th Aachen Colloquium China in 2017 has been a great success. This year again, the organizers are looking forward to welcoming numerous engineering executives and technical experts during the event. It serves as a platform for discussions, for example about future mobility, vehicle electrification, advanced driver assistance systems and high-efficiency engines as well as strategy concepts. The 8th Aachen Colloquium China offers more than 40 presentations, held by speakers from international leading OEMs and suppliers. Moreover, the organizing team was able to win high-ranking keynote speakers. In the plenary session on November 15th, starting at 8.30 am, Dr. Hua Gao, Director of the Powertrain Development of Audi (China) Enterprise Management Co., Ltd., will talk about zero emission technologies for future mobility. Mr. Masaki Toriumi, Alliance Global Director of Nissan Motor Co., Ltd., will follow to present the electrified strategy of Nissan. Mr. Ping Qi, Head of the Engineering Center of ZF (China) Investment Co., Ltd., will complete the plenary session with his presentation about "Next Generation Mobility – ZF Solutions for Megacities". A joint discussion offers the audience the possibility to discuss the plenary speeches.

As in the previous years, the presentation program of the 8th Aachen Colloquium China will be accompanied by a technical exhibition in the Beijing Marriott Hotel

Northeast. Several international companies will present their innovations on automobile and engine technologies. The exhibitors are CAMBUSTION; Continental, ElringKlinger, FEV Group GmbH, Hauzer Techno Coating (Shanghai) Co., Ltd, iwis engine systems (Pinghu) and TE Connectivity.

In addition, a festive banquet at the Grand Concordia Hotel on November 15th, 6:00 p.m., will give the participants the opportunity for personal exchange and networking while enjoying a delicious buffet. Welcome speeches held by a representative of the German Embassy, Prof. Eckstein and Prof. Pischinger will open the banquet. A special evening program always enriches the banquet.

The Aachen Colloquium China is a subsidiary of the largest and most important conference on automobile and engine technology in Europe, the Aachen Colloquium Automobile and Engine Technology. Its organizers are the Institute for Combustion Engines (VKA) and the Institute for Automotive Engineering (ika), both renowned institutes of RWTH Aachen University in Germany. This year, the colloquium in Germany took place for the 27th time. Offering more than 100 technical presentations and 69 exhibitors from the global automotive industry, the conference welcomes about 1800 participants every year. This event provides the foundation for the Aachen Colloquium China.
